

Arihant Jain

arihantjain7106@gmail.com | Ahmedabad, India | [linkedin](#) | [github](#) | [portfolio](#)

PROFESSIONAL SUMMARY

B.Tech Information Technology student building AI applications, backend systems, and automation workflows through hands-on projects, hackathons, and practical development. My work includes AI-powered products, NLP applications, data workflows, and API-based systems. Interested in building useful AI/ML solutions and growing as a software engineer.

TECHNICAL SKILLS

- Languages & Libraries: Python, TypeScript, Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy
- Frontend: React.js, HTML, CSS, Tailwind CSS, Next.js
- Backend & APIs: REST APIs, FastAPI, Supabase, SQL
- AI / ML: NLP, Machine Learning, Data Analysis, Generative AI, LLM Applications, AI Agents
- Automation & Tools: n8n, AWS, Git, GitHub

EDUCATION

Silver Oak University, Ahmedabad

2023 – 2027

Bachelor of Technology, Information Technology — CGPA: 8.61 / 10

INTERNSHIP EXPERIENCE

Green Skills & AI Trainee — Skills4Future Program | Silver Oak University

Dec 2025 – Jan 2026

- Used AI and data analysis techniques to work on sustainability-focused problem statements.
- Analyzed structured datasets to identify trends and support problem-solving.
- Worked with team members to develop AI-driven solutions.

PROJECTS

GeoVision — AI-Powered Geospatial Analytics Platform

July 2026 – Sep 2026

<https://github.com/arihant2207/GeoVision.git>

- Built an analytics platform that processes location datasets to generate intelligent location recommendations.
- Designed data-processing pipelines for scoring, ranking and comparing locations using business and geographic features.
- Developed recommendation, similarity-analysis, and chatbot modules for location-based decision support.
- Worked with a 3-member hackathon team to deliver a working prototype under strict deadlines.

ResumeBoost — AI Resume Optimization Platform

JUN 2026

FastAPI, Next.js, Supabase, Gemini 2.5 Flash | <https://resumeboost-tau.vercel.app/>

- Developed a web platform for resume analysis and job-description-based optimization using FastAPI, Next.js and Supabase.
- Built an NLP-based resume parser to extract structured information from unstructured resumes.
- Implemented LLM-powered analysis and personalized recommendations based on job descriptions.
- Added retry and fallback handling for inference workflows and debugged and optimized backend APIs.

AI FinancialAdvisor — Personal Finance Chatbot

Sep 2024 – Nov 2025

Python, NLP, Machine Learning

- Developed an NLP-based financial assistant for personalized budgeting and investment guidance.
- Used text-processing and machine-learning techniques to generate context-aware recommendations and designed conversational workflows for user interaction and decision support.

AI Newsletter Research Agent

Sep 2024 – Nov 2025

n8n, OpenAI, RSS APIs, Google Sheets

- Built an automated research workflow using n8n to collect AI news from multiple sources.
- Integrated APIs/RSS feeds and automated data processing and organization in Google Sheets. Used LLM-based processing to summarize and structure research outputs.

ACHIEVEMENTS & CERTIFICATIONS

- Top 7 Teams — Smart India Hackathon (SIH) 2025, Silver Oak University.
- Tic Tech Toe Hackathon 2026 Participant — built GeoVision with interactive maps, AI insights, and real-time data visualization.
- AWS Academy Graduate — AWS Academy Cloud Foundations
- Oracle Cloud Certificate
- Google Cloud Career Launchpad — Cybersecurity Track
